Polycom SoundPoint Pro

High-quality conferencing
right from your desktop

▼ **All-in-one communications at your fingertips—conferencing, handset and headset support**

▼ **High-quality voice clarity with full-duplex conferencing—for natural two-way conversations**

▼ **Caller ID and Caller ID on Call Waiting—identifies incoming calls quickly**

▼ **20-number programmable speed dial—saves dialing time**

▼ **99-number caller history for Caller ID—easily locate and dial stored numbers**

Desktop audioconferencing at its finest. Small businesses and home-office professionals need the same high-quality audioconferencing capabilities they would use in a corporate office. Now, Polycom® introduces the feature-rich SoundPoint® Pro to provide corporate-quality audioconferencing capability in an elegant, personal business phone. SoundPoint Pro seamlessly integrates handset and headset telephone functionality with crystal clear, hands-free audioconferencing in a single business telephone that sounds as great as it looks.

Hold four-way audioconferences. SoundPoint Pro utilizes the same industry-leading conferencing technology that has made Polycom's SoundStation® conference phones the top choice of corporations worldwide. With the touch of a button, SoundPoint Pro lets you hold clear, full-duplex audioconferences with up to three additional participants for a multipoint conference call. Callers can speak when they want, without the clipped sentences and one-way conversations common with ordinary business speakerphones.

Versatile features make your phone time more productive. SoundPoint Pro's front microphone is optimized for personal use. If several associates join you, switch to the keypad-activated rear microphone at the touch of a button. It provides 360-degree room coverage for small group conferencing. Or you can connect the optional headset for high-quality, hands-free applications. And extra cables and boxes won't weigh you down—the headset amplifier and volume controls are built in.

And, SoundPoint Pro costs less than you might think. Get more done and be more efficient, with SoundPoint Pro from Polycom.

POLYCOM

SoundPoint Pro—the full-featured desktop phone that puts professional conferencing within reach for any small business or home office

▼ Easily switches from full-duplex personal conference phone mode to 360-degree conference mode at the touch of a button

▼ 32-character LCD display shows number dialed, length of call and other data

▼ 99-number call history directory lets you check/verify past usage

▼ Mute button allows private off-line conversation without other party hearing your conversation

▼ Three modes of operation to fit your specific requirements: use with handset, with headset or in speaker mode

▼ Caller ID with Caller ID on Call Waiting
